Relevant Coursework:

Discrete Structures with Computer Science Applications, Object-Oriented Programming and Data Structure in Java, Object-Oriented Application Development, Data Structures and Algorithms, Database Fundamentals, Intro to Software Engineering

WEB PROJECTS

Stream Search

Full-stack MERN project which allows users to search for their favorite shows/movies in one search. User can sign-up and login into their account to save their favorite account.

Gathering of Informed Traveler

Front-end project which allows users to be informed about the cities that they are willing to travel to. Data from the cities are being rendered via various server-side APIs such as Yelp, OpenWeather, and GeoCityDB.
